VOL. XXI. NO. 145. TONOPAH, NEVADA, SATURDAY EVENING, DECEMBER 3, 1921. PRICE TEN CENTS

ROYSTON ORE GOES BETTER THAN 10,000 OUNCES

GOOD ORE IS FOUND IN DEVELOPMENT OF TONOPAH EXTENSION

Development work at the property of the Tonopah Extension Mining company for the week ending December 2, was up to normal, with 322 feet of work accomplished. Excellent ore is being developed on the 1700 level, where a total of 27 feet was advanced on 5 feet of ore. During the week the deal was closed by which the company took over the holdings of the Cash Roy Consolidated Mining company for a stock consideration. No announcement has been made as to when the new owners will commence work on the new section of their property. Development is officially reported for the week follows:

No. 2 Shaft.
"600 Level—644 crosscut advanced 24 feet in West End rhylolite.
McKane Shaft.
"1200 Level—1203 crosscut advanced 32 feet in West End rhylolite.
"1540 Level—1510 raise advanced a few rounds on the rhyolite-andesite contact, and was then stopped. Working of 1517 crosscut made good progress.
Victor Shaft.
"1000 Intermediate level—No. 1 east drift, Merger vein, was continued on low-grade quartz. Stopping is in progress on the Merger vein.
"1000 Level—1616 west drift advanced 6 feet on low-grade quartz and was stopped. 1616 crosscut advanced 22 feet in andesite. 1614 crosscut advanced 7 feet in Keweenaw breccia and was temporarily stopped while drifts 1617 east and 1617 west are being started on the vein on last week. Stopping is in progress on the Murray, Merger, Homing and Victor veins.
"1700 Level—1701 crosscut advanced 27 feet in West End rhylolite and cut some quartz carrying low feet."

BIG TONNAGE RAISED FROM TWO SHAFTS OF WEST END PROPERTY

Conditions at the two shafts of the West End Consolidated Mining company show normal conditions for the week ending December 3, 1921. On the 500 level of the West End shaft, in raise 530 No. 2, a narrow streak of high-grade is being followed, while on the intermediate drift 683 occasional values are being shown in the work that is being done.
Tonnage and quality of ore mined during the week was satisfactory, a total of 1700 tons having been raised. The official report for the week, as given out by the management of the company, follows:
West End Shaft.
"From the West End shaft, 413 raise C is making good headway in low-grade vein material. On the 500 level, 546 drift was driven ahead in low-grade vein material. Drift 530 No. 2 has been discontinued and raise 530 No. 2 started on a narrow streak of high-grade ore. Intermediate drift 683, which is in the foot-wall of the vein, shows occasional values. On the 900 level, raise 968 made good progress.
Ohio Shaft.
"From the Ohio shaft, raise 555 No. 18 has reached the hanging-wall and stopping will be started. On the 800 level crosscut 862 made a small advance. Work has been resumed in raise 568, with no change to report. Raise 570 made the usual progress with no change. Raise 571 was driven to facilitate stopping operations. Intermediate drift 871 from raise 571 on the vein shows low values. On the 1100 level, 1106 raise made fair progress with no change. The regular footage was made in Tonopah 76" workings with no change to report."

CONNORS & HALLIBAN GIVEN STAGE PERMIT
Connors & Halliban received a wire late this afternoon from the public service commission instructing them to begin operation of a stage line to Royston immediately. They will resume operations tomorrow, Sunday, morning, at 9:30 o'clock, when their auto stage will leave from Marty's store for the new bonanza camp, carrying passengers and freight. Reservations can be made either at Marty's store or by telephoning 1014.

NEGOTIATIONS NOT THOUGHT VERY HOPEFUL

(By Associated Press)
DUBLIN, Ireland, Dec. 3.—Members of the Dail Eireann cabinet assembled today to consider the British government's latest proposals for an Irish peace settlement. There is little optimism as to its decision and Sinn Fein delegates to London are reported as believing the revised terms to be unacceptable to De Valera and his advisers.

MRS. DELMONT IS ARRESTED FOR BIGAMY

(By Associated Press)
SAN FRANCISCO, Cal., Dec. 3.—Madera county authorities have notified the police that a deputy sheriff is en route here to get Mrs. Ramona Maude Delmont, complaining witness against Arbuttle, who was arrested yesterday on a Madera warrant charging her with bigamy. The warrant reached here two weeks ago, but was not served until yesterday. Mrs. Delmont spent the night in the city prison.

UNION HEADS IN KANSAS CITY IGNORE COURT

(By Associated Press)
KANSAS CITY, Dec. 3.—Representatives of union packing house workers in Kansas City, Kansas, today carried out their decision to ignore the summons issued by the Kansas court of industrial relations, which was convened in Kansas City to take up the threatened strike called for Monday. Nine officials of five local unions cited answered to their names in court.
No attorneys responded for the unions. All of the big five packers were represented by attorneys. Answering the citation read by the court, the packers' attorneys said they were to give any information they had without admitting the jurisdiction of the court in the matter.

JAPS DELAY DECISION ON ARMS RATIO

(By Associated Press)
WASHINGTON, D. C., Dec. 3.—With the latest developments in the negotiations on the question of naval ratio for Japan represented by its delegation of spokesmen as justifying optimism, although the nature was a closely guarded secret, the matter was expected to remain at a standstill while Baron Kato communicated further with Tokyo.
Making what was considered a direct allusion to the naval ratio question, Zenoske Yokata, president of the legislative bureau of the Japanese cabinet, in an address here declared that a true and impartial spirit of disarmament should take into consideration not only the existing strengths of the navies, but also the potential powers of each country.

GRAND JURY WILL HOLD A SESSION

The grand jury of Nye county will hold a regular session tonight at the courthouse.

BIG STRIKE BY LEASER ON HUDSON PROPERTY

An almost unparalleled strike of high-grade silver ore has been made at Royston. Ore to the value of from 5000 to 10,000 ounces has been uncovered in the Best Chance claim of the Hudson Mining company, and news of the immense find has just reached the city.

Luigi Tabaracci, leasing from the original operators in the bonanza district, is the fortunate possessor of the lease from which the enormous values have been obtained. Tabaracci arrived in town today with samples from the workings, and was more than overjoyed when he received the news of the richness of his discovery.

Three feet of ore have been opened and the exceptional values are found in the vein. According to W. H. Royston, vice-president and general manager of the Hudson company, picked samples will run even better than the \$10,000 figure.
Main street, Royston, will be busier than ever.

NO VERDICT YET IN TRIAL OF ARBUCKLE

(By Associated Press)
SAN FRANCISCO, Cal., Dec. 3.—Nothing remained today of the Arbuttle trial but the verdict, and, if that is adverse to him, the sentence. The jury got the case shortly after 4 o'clock yesterday afternoon, and was to resume its deliberations at 10 a. m. today.

The jury appeared fresh after its night's rest. Reports that it was divided last night 11 to 1 for acquittal persisted, but there was nothing to give any amount of tangibility to the report. Corridor gossip said one woman was holding out for conviction.

At noon the jury was given a two hours' luncheon period, with no indication of a verdict in sight. Arbuttle appeared a few minutes before 10 o'clock wearing a thick black overcoat. He did not have the haggard look that he carried away with him last night. He chatted with newspaper men and others in an apparently carefree manner.

NEVADA MINES LOOK BETTER SAYS BROKER

A recent market letter of Thomas S. Robinson & Co., San Francisco brokers, says:

"An analysis of the market shows we have reason to thank the Lord that the curse of the professional wildcatter which hung over Bush street during the early months of 1921 is now happily removed; that liquidation of mining stocks was completed before the summer slump in Wall street; that more real legitimate development of mining properties is being made in Nevada than at any time in the last 15 years; and finally that, with the continued high price for metals and lower cost of production, the shares of precious metal companies are without question the most attractive speculation in the country."

MEN WILL LOSE PLACES IF THEY STRIKE MONDAY

(By Associated Press)
CHICAGO, Dec. 3.—Coincident with an order from Armour & Co. of the big five packers that all employees who strike Monday in protest against the 10 per cent wage reduction will lose their places, advertisements are appearing in newspapers calling for men to fill the vacancies if the union men strike.

SAN FRANCISCO PAYS HOMAGE TO FRENCHMAN

(By Associated Press)
SAN FRANCISCO, Cal., Dec. 3.—Marshal Foch, arriving in San Francisco today, was greeted by thousands who packed the sidewalks along Market street as he passed at the head of a military and naval parade. Leaving his special train at Berkeley, the French military leader was driven through the University of California grounds, and at Oakland pier he boarded a special ferry boat which took him to San Francisco. City, state, army and navy officers welcomed him.

WOMAN WANTED IN MURDER CASE HELD IN ITALY

(By Associated Press)
CLEVELAND, Ohio, Dec. 3.—Victoria Passelli, who is said to have stabbed to death Daniel Kaber, a wealthy publisher, two years ago, has been captured in Italy, according to word received here from two Cleveland detectives. As there is no extradition treaty between the United States and Italy for capital offenses, Passelli probably will be tried in that country. Passelli is the last of six alleged conspirators in the Kaber murder plot to be arrested. They were to have been paid \$5000 by Mrs. Eva Catherine Kaber, the slain man's widow, who also was convicted and sentenced to life imprisonment.

MORSE ASKS MORE TIME FOR RETURN

(By Associated Press)
WASHINGTON, D. C., Dec. 3.—Charles W. Morse, shipbuilder and financier, who arrived at Havre yesterday, was directed by Attorney General Daugherty to sail Monday from Havre back to the United States.

(By Associated Press)
HAVRE, France, Dec. 3.—Charles W. Morse today called Attorney General Daugherty asking permission to delay his departure for the United States until the sailing of the steamship George Washington on January 5.

STATION BEING CUT IN BROUGHER DIVIDE

Satisfactory progress is being made at the property of the Brougher Divide Mining company. Two shifts are now being employed at the well-known property in cutting a station on the 364 level, and excellent progress is being made. As soon as this work is finished prospecting will be started to open up ore bodies in the vicinity.

PROGRESS FAVORABLE DURING THE WEEK AT THE TONOPAH BELMONT

In the extensive development work that is being carried out at the Tonopah Belmont property, good results are being attained and favorable progress was made during the past week.

A streak of good ore has been developed in vein 1829, reached from north crosscut No. 2 from east drift on the 1200 level. On the 1600 level 1 1/2 feet of fair ore has been found in the Mizpah Paul vein in raise 118.

The Shoustrup vein, for which prospecting was being done last week in a west drift on the 500 level, has been located and 1 foot of low-grade quartz developed. Conditions at both the mine and mill are very satisfactory and the usual production is being maintained.

The official report of the company for the week ending December 1, 1921, follows:

"700 Level—Northwest crosscut 702, off east drift from raise 5, prospecting in Mizpah trachyte. Raise 19, off east drift 729, 729 vein, 1 foot low-grade ore. Raise 20, off west drift 728, 729 vein, 1 1/2 feet low-grade ore.
"800 Level—Northwest crosscut 8046, off west drift 802, prospecting in Mizpah trachyte. Northwest crosscut 8049, off west drift 8003, stopped temporarily. Southwest crosscut 8052, off 845 all running for mining purposes. West drift 8053, off northwest crosscut 8048, 1 foot low-grade quartz. Intermediate west drift off slope 855, North vein, 2 feet of mill ore. Raise 64, off southwest crosscut 8048, tunnel for mining purposes.
"900 Level—West drift 9005, off

VALUABLE SHIPMENT MADE THIS WEEK FROM GOLD ZONE DIVIDE

True to the predictions made by the management of the Gold Zone Divide Mining company last week, a shipment of between 50 and 55 tons of ore running \$50 to the ton was made from this well-known divide property this week. This is but the first of many shipments that will continue to come from this producer.

Development work has gone along satisfactorily, according to Captain H. R. Bradley, engineer in charge of mining operations. A total of 85 feet of work was accomplished, and values in the veins that have so far been exposed are increasing in value.

Increase in value is particularly apparent in the ore being developed in the drifts from raise 506, and is also true of the work done so far in raise 503, which is to be advanced a total of 50 feet and drifts sent to raise 506.

No change is reported in the condition so far resulting from the work in raise 310. This raise is being extended into virgin territory to intercept any ore shoots that may overlie the 300 level. It is confidently expected by the engineer in charge at the present time that good values will be obtained in the upper levels.

MINE INSPECTOR STARTS ON TRIP

Andy Stinson, state inspector of

BUTLER THEATRE
"RICH GIRL—POOR GIRL"
—WITH—
GLADYS WALTON
Riches and poverty are strikingly contrasted in this Universal photodrama. The story fairly tangles with romance and adventure.
